Professional Summary

MCA Generative AI Student with production LLM experience at AndAI and through self-driven projects. Built and deployed LLM-powered applications integrating FastAPI, retrieval systems, embeddings, structured outputs, and workflow automation. Hands-on experience with backend API development, prompt engineering, inference services, and scalable AI application design. Pursuing M.C.A. in Generative AI at SRM University with a GPA of 9.0/10.

Technical Skills

Languages: Python, SQL, Java (Basic), C/C++, JavaScript, R

Backend & API Development: FastAPI, REST APIs, API Integration, MCP (Model Context Protocol)

AI, LLMs & Agent Systems: Chatbot Development, Autonomous AI Agents, Function Calling, Agent Orchestration, RAG, Prompt Engineering, LangChain, Scikit-learn, NumPy, Pandas, XGBoost, HuggingFace Transformers

LLM & RAG: RAG Pipelines, Embeddings, Chunking, Retrieval, Prompt Engineering, Structured Outputs, Function Calling

Databases & Data Systems: SQL, Supabase (PostgreSQL), Vector Databases (embeddings, similarity search)

Automation & Workflows: n8n, Flow Enterprise, API-driven Workflow Automation

Backend & Tools: FastAPI, REST APIs, MCP, Docker, Git/GitHub, Jupyter, Postman, n8n, Flow Enterprise

Platforms: Siemens Insights Hub

Experience

Generative AI Intern Nov 2025 – Feb 2026
AndAI

- Deployed and maintained LLM inference services in production using FastAPI and MCP, integrating, testing, and debugging AI-powered backend systems.
- Built RAG pipeline prototypes using Supabase pgvector and embedding-based similarity search, evaluating retrieval quality across multiple document types.
- Automated backend workflows using n8n and Flow Enterprise while validating structured LLM outputs to reduce hallucinations and schema violations.
- Collaborated on real-world AI application deployment, API integration, monitoring, testing, and production issue resolution.

Projects

KAAL AI — Live Conversational Chatbot 2026

- Developed and deployed a live, production-ready chatbot using FastAPI with intent classification, multilingual language detection (English, Hindi, Hinglish), emotion-aware prompting, and session-based memory.
- Gained hands-on experience in backend API architecture, LLM integration, prompt control, and scalable chatbot system design.

Semantic Job Matcher — RAG & Embedding Pipeline GitHub 2026

- Built resume-to-job semantic matching using sentence embeddings and vector similarity search; delivered ranked job alerts via Telegram.
- Orchestrated end-to-end RAG pipeline with n8n: document parsing → embedding generation → vector retrieval → reranked output.

Education

SRM University, Kattankulathur 2025 – Present
M.C.A. — Generative AI Specialisation *GPA: 9.0 / 10*

MIT World Peace University, Pune 2022 – 2025
B.C.A. — Computer Applications *CGPA: 8.0 / 10*

Project repositories, live demos, and references available upon request.
